How to save your artwork

If you prepare your designs directly onto this template please crop each side to the actual size (95 x 50mm) and export them as high quality jpg or png files. They will then be ready at the correct size to upload to our website when you place your order.

A quick note on preparing your design

When preparing the artwork for the back of your cards please use the above design for reference as it clearly shows the type of information you should include. At minimum please include the following details:

1. Clear download instructions.
2. The web address where your cards can be redeemed - **www.procards.com/your-download-url**
3. A clear space for a 16 digit download code. The code is printed in the arial bold font and can be any size and colour.

If you have any doubts or are unsure how to prepare your design please contact a member of our team at **artwork@procards.com**
